Who we are

Sharp Rees-Stealy, the first medical group of its kind in San Diego, was established more than 80 years ago on a foundation of leadership, collaboration and compassion. As the city's original multi-specialty practice, we broke new ground and quickly set the standard for the entire region.

Today, the same qualities that distinguished us in 1923 remain the cornerstone of our philosophy. As San Diego's largest and most comprehensive medical group, we are steadfast in our commitment to:

- > Ensure our patients the most up-to-date options for their care
- > Provide a caring, highly personalized approach to medicine and
- > Build partnerships — among our physicians and members of our clinical staff, with our patients and their families, and with the community we serve.

We believe that our approach is unique in the region, and we're confident it is why so many San Diegans entrust their health care to us — nearly a quarter of a million patients each year.

A partnership for excellence

Chances are, you or someone close to you has experienced firsthand the Sharp Rees-Stealy advantage. Perhaps a team of our outstanding doctors guided you or a family member through a challenging health condition. Or maybe you were particularly impressed with the attention our clinical staff gave you during a routine exam or procedure.

Because friends like you understand, better than anyone, what sets us apart, we would like to invite you to enter into a special kind of partnership with us.

Innovation and sound leadership have enabled Sharp Rees-Stealy to achieve remarkable results while remaining exceptionally cost-effective. But if we are to keep pace with emerging techniques and technologies, offering the same leading-edge care our patients have always expected from us, we must turn to partnerships with individuals like you, who recognize the stakes and have a special appreciation for the way we practice medicine.

Investing in the future

Your generous gift to the Sharp HealthCare Foundation, on behalf of Sharp Rees-Stealy, will make it possible for us to address such critical needs as:

- > Acquiring the latest medical technology
- > Ensuring our patients the most advanced facilities possible
- > Extending our health education and outreach programs and
- > Building an endowment that will generate a permanent income stream, enabling us to respond to our most urgent priorities.

Through your contribution, you will join the growing number of donors who acknowledge the critical role that Sharp Rees-Stealy plays in their lives, and are eager to safeguard that role by making an investment in our future.

Extending our thanks

Because your commitment is essential to our ongoing success, we will be honored to recognize your gift in a variety of ways. Contributions between \$100 and \$999 will enroll you in the Sharp Rees-Stealy Society, which includes a subscription to our magazine, *In Focus*, and an invitation to our annual donor appreciation reception.

With your gift of \$1,000 or more, you will also become a Sharp Rees-Stealy Partner in Health, a benefit that includes invitations to quarterly members-only forums, seminars and lectures with our physicians. Many donors find these events a welcome opportunity to interact with our renowned doctors outside a clinical setting. You will also become a Sharp Friend of the Foundation. Among other benefits, Friends of the Foundation receive special personal attention when they are admitted to a Sharp hospital. In addition, we will inscribe your name on the Wall of Honor at the Sharp HealthCare facility of your choice.

Perhaps the most significant benefit you will enjoy, however, is a personal one. By investing in Sharp Rees-Stealy, you will gain the satisfaction of supporting an organization that directly enhances the health of your family and our community. As we face the challenges of the 21st century, your gift will allow us to continue building on our distinguished history, setting the pace for innovation and the standard for compassionate care for generations to come.

Please join us today in this critically important enterprise.
